

**Remarks:**

Applicants appreciate Examiner Baxter's participation in the telephonic interview with Applicant's Attorney held on December 17, 2008, during which Applicants' Attorney and Examiner Baxter discussed proposed amendments to claim 1 that further clarified the rotation of the longitudinal axis of the body relative to the mounting member in a common "rotational" plane.

At the conclusion of the interview, Examiner Baxter indicated that she would consider Applicants' proposed amendments to claim 1. Further, Applicants' Attorney authorized the Examiner's Amendment during a telephonic interview with Examiner Baxter on December 18, 2008.

Applicants have amended independent claim 1 to correct for an antecedent basis issue. Specifically, independent claim 1 is amended herein to replace "a longitudinal axis thereof" with "the longitudinal axis thereof," a limitation which has an antecedent in claim 1. The amendments to claim 1 herein merely correct formal matters without changing the scope thereof and do not affect the patentability of the claims. Applicants respectfully request entry of the present amendments.

In connection with this matter, please charge any otherwise unpaid fees which may be due, or credit any overpayment, to Deposit Account Number 501798.

Respectfully submitted,
